Professional Summary

Information Technology undergraduate at **IIIT Sonapat** with 5+ months of experience in **AI model evaluation, prompt engineering, and RLHF** at Outlier AI. Proven expertise in designing adversarial evaluation tasks, benchmarking frontier LLMs across coding and reasoning domains, and architecting full-stack web applications (MERN). Skilled in C/C++, Python, React.js, Node.js, and relational databases with strong foundational knowledge in DSA, OOPs, DBMS, Operating Systems, and Computer Networks.

Education

Indian Institute of Information Technology (IIIT), Sonapat

B.Tech in Information Technology — CGPA: 6.5

Aug 2023 – Aug 2027

Sonapat, Haryana

Adarsh Regional Senior Secondary School

RBSE Class XII — 83.0%

2022

Nadbai, Bharatpur, Rajasthan

Experience

Outlier AI — AI Evaluation & Prompt Engineer (Remote)

March 2026 – Present

Prompt Engineering, LLM Evaluation, RLHF, Adversarial Testing, Python, C++, Code Quality QA

- Designed and executed **adversarial evaluation tasks** and complex prompt frameworks for frontier LLMs to identify reasoning failures, instruction-following breakdowns, and edge-case hallucinations.
- Conducted rigorous **Reinforcement Learning from Human Feedback (RLHF)**, multi-turn reasoning rubrics, and response ranking across Python, C++, and JavaScript algorithmic benchmarks.
- Authored comprehensive failure analyses and gold-standard reference code solutions, maintaining a **98%+ task acceptance rate** across enterprise AI quality and evaluation pipelines.

Projects

AI Video-to-Text Multimodal Captioning Pipeline

Jan 2026 – March 2026

PyTorch, Transformer Decoder, ResNet-152, C3D, Contrastive Loss, Python, CUDA

- Engineered an end-to-end multimodal deep learning pipeline extracting spatiotemporal features from video keyframes to generate coherent natural language descriptions.
- Built a dual-backbone feature extractor (ResNet-152 spatial + C3D temporal motion) with a cross-modal fusion layer projecting into 512-dim context vectors.
- Integrated a GPT-style autoregressive Transformer decoder with hybrid Cross-Entropy and Contrastive Loss | github.com/vedumeena01/video-to-text-captioning

Real-Time AI Biometric Anti-Spoofing Security System

Dec 2025 – Jan 2026

Python, OpenCV, PyTorch, dlib, Silent-Face Anti-Spoofing, AES-256 Fernet Encryption

- Developed a real-time computer vision security pipeline integrating multi-face detection with deep learning anti-spoofing ensemble to reject replay attacks and masks.
- Engineered a thread-safe encrypted biometric database utilizing AES-256 Fernet encryption for secure face embedding storage and sub-50ms identification.
- Optimized multi-threaded frame processing and model inference pipelines, achieving 30+ FPS real-time throughput | github.com/vedumeena01/ai-face-anti-spoofing

Autonomous Line-Following & Maze-Solving System

Jan 2026 – Feb 2026

C, C++, Arduino/ESP32, Sensor Fusion, Closed-Loop PID Control, Graph/Maze Algorithms, Git

- Architected an autonomous robotic navigation system utilizing sensor arrays and closed-loop **PID controllers** for high-speed line tracking across complex trajectories.
- Engineered dynamic **maze-solving algorithms** (Left-Hand Rule & Shortest Path) to detect 90° turns, dead ends, and T-junctions, computing optimal return paths in real-time.
- Implemented low-level motor driver PWM calibrations and hardware interrupts, reducing response latency by **35%** | github.com/vedumeena01/line-following-maze-solver

Technical Skills

Languages: C, C++, Java, Python, JavaScript (ES6+), SQL

AI & Data: Prompt Engineering, Adversarial LLM Testing, RLHF Evaluation, Data Engineering, Power BI

Frontend: React.js, HTML5, CSS3, Tailwind CSS, JavaScript, Responsive UI/UX

Backend & DB: Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB Atlas, MySQL

Core Subjects: Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems, Computer Networks, TOC

Developer Tools: Git, GitHub, VS Code, Postman, Linux / Bash

Certifications & Achievements

- AI - Data Engineering Analyst:** Certified by **NASSCOM / IT-ITeS SSC & Skill India Digital Hub** in AI workflows and data pipelines (Aug 2026).
- Mastering Power BI (Data Analysis & Dashboard Creation):** Certified by **PHN Technology & Skill India Digital Hub** (Aug 2026).
- Algorithmic Problem Solving:** Solved **200+ Data Structures & Algorithms problems** on platforms including LeetCode and GeeksforGeeks (Arrays, Trees, Graphs, DP).
- Hackathons & Competitions:** Active participant in institute-level technical hackathons and coding challenges at IIIT Sonapat.
